DETAILED ACTION

Acknowledgements

1. The Examiner for this case has changed. Please note the Examiner of record is Joshua Murdough in and future correspondence.
2. This action is responsive to Applicant's amendment to the claims on 8 January 2008.
3. Claims 1-14, 16, 17, and 19-33 are currently pending.

Reasons for Allowance

4. The following is the Examiner's statement of reasons for allowance.
5. Regarding the claimed terms, the Examiner notes that a "general term must be understood in the context in which the inventor presents it." *In re Glaug* 283 F.3d 1335, 1340, 62 USPQ2d 1151, 1154 (Fed. Cir. 2002). Therefore the Examiner must interpret the claimed terms as found on pages 1-52 of the specification. Clearly almost all the general terms in the claims may have multiple meanings. So where a claim term "is susceptible to various meanings, . . . the inventor's lexicography must prevail . . ." *Id.* Using these definitions for the claims, the claimed invention was not reasonably found in the prior art.
6. Furthermore, the decision by the Board of Patent Appeals and Interferences ("Board") rendered 28 March 2007 ("March 2007 Board Decision") has been relied upon. Specifically, the Board stated that an "affiliation" requires more than an arrangement to perform future business transactions between two parties. (March 2007 Board Decision, Page 4, Paragraph 2)
7. The primary reference King (U.S. 6,529,286) discloses as previously discussed. King however does not teach at least an image database, comparing the received image to an image in

the database, and the orderer, laboratory, and agency being affiliated. Moreover, the missing claimed elements from King are not found in a reasonable number of reference(s). Yet even if the missing claimed elements were found in a reasonable number of references, a person of ordinary skill in the art at the time the invention was made would *not* have been motivated to include these missing elements in an embodiment in the King disclosure because, as shown by the March 2007 Board Decision, the currently claimed invention is not simply a collection of elements, but also requires a particular relationship between the parties.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

10. Kubler et al. (U.S. 5,726,984) show the use of an image database and comparing data to that in the database, but not in preparation to print the image.

11. Ishida (U.S. 2001/0017711) shows a similar print request system with a different arrangement and relation of the parties.

12. "Print '91 prepress preview: expect a focus on color" shows a variety of printing processes and technologies known at the time.

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOSHUA MURDOUGH whose telephone number is (571)270-3270. The examiner can normally be reached on Monday - Thursday, 7:00 a.m. - 5:00 p.m.
